## The Challenge

Multiple business acquisitions resulted in a fragmented back office. This disconnected approach made it harder for diva-e Conclusion to make informed strategic decisions. Staff struggled to get the right data to continue to work in the most effective ways. And it was difficult to adapt quickly to change.

**Unit4 supports us to make faster, more confident business decisions, because all the data is in one trusted source. We can now produce insights and reports in a fraction of the time it used to take. This makes our processes much more efficient.**
