

Municipality of Haarlemmermeer chooses Unit4 ERPx to professionalize information provision

gemeente
Haarlemmermeer

Following a tender process, the municipality of Haarlemmermeer selected Unit4's ERPx solution to advance its goal of professionalizing its information services. ERPx, a modern and innovative SaaS solution, offers continuously evolving functionalities. This ensures the municipality benefits from enhanced process support while remaining agile in responding to market developments.

Municipal Services go digital

The municipality of Haarlemmermeer, home to 160,000 residents and including towns such as Hoofddorp, Nieuw-Vennep, and Badhoevedorp, as well as Schiphol Airport, employs approximately 1,200 civil servants. With a medium-term goal of extensive digitization, ERPx, a modern financial cloud system, can support this transformation.

Commitment to sustainability

The municipality will leverage ERPx to support budget monitoring, manage expenses, and oversee projects, among other functions. ERPx features like built-in notifications and real-time insights into budget expenditures provide added value. Additionally, the municipality appreciates Unit4's commitment of ensuring that the Microsoft Azure data centers hosting ERPx will be fully green by 2025.

“The SaaS solution has a great track record in the public sector, and that strengthens my feeling that this solution will help us to fulfill our ambitions in terms of digitization.”

Rachid Saghraoui

Cluster Manager, Finance at the municipality of Haarlemmermeer

Rachid Saghraoui, Cluster Manager, Finance at the municipality of Haarlemmermeer: “In our search for a new financial system, Unit4 ERPx stood out as the solution that best matched our requirements. The SaaS solution has a great track record in the public sector, which strengthens my feeling that this solution will enable us to fulfill our ambitions in terms of digitization.”

Wilfried Teunissen, Sales Manager Public Sector at Unit4: “We are proud to add yet another municipality to our customer portfolio. This confirms how ideal this solution is for organizations in the public sector, and it is nice when our efforts to achieve this are appreciated by our customers.”
