

Unit4 supports University of Twente finance department with smart next-generation ERP

UNIVERSITY OF TWENTE.

Following a tender process for a new financial system, the University of Twente has chosen Unit4 Enterprise Resource Planning (ERP). Among other things, Unit4 ERP will enable the finance department to support the university's core business more fully through insightful reports broken down by function. Furthermore, manual work will be replaced by automated processes, leaving more time for consulting.

Choosing Unit4 ERP

The University of Twente had several requirements for the implementation of the new financial system. The choice fell on Unit4 ERP because of the flexibility the system offers, for example, in structures, the extensive possibilities in financial and project administration, and the flexible and role-dependent design report and dashboard options. The University of Twente also chose Unit4 because of its strong innovation strategy and the drive and expertise of its employees.

As a university, our financial and project administration is complex, which did not make the search for a suitable system easy. Nevertheless, during the European tender process, Unit4 ERP was unanimously judged to be the clear winner.

"As a university, our financial and project administration is complex, which did not make the search for a suitable system easy. Nevertheless, during the European tender process, Unit4 ERP was unanimously judged to be the clear winner. We therefore look forward to the ongoing implementation and cooperation with confidence." Dennis van Zijl, Director of Finance at University of Twente.

Wilfried Teunissen, Sales manager at Unit4: "In the tender process, the University of Twente was clearly looking for a supplier with whom they could enter into a partnership. During the process, it became clear to us that all the preconditions for a well-functioning

partnership are in place. Both the University of Twente and Unit4 have a clear people-first strategy, where everything you do and every choice you make revolves around employee satisfaction. This shared mindset makes it a pleasure for us to enter into this partnership.”

use of science and technology to achieve maximum impact on people, society, and connections. With its open, inclusive, and entrepreneurial attitude, UT seeks to contribute to the development of a fair, digital, and sustainable society where people always come first.

University of Twente

UT is an engineering and social sciences university with more than 3,500 employees and nearly 15,000 students. UT attaches great value to the sustainable
