

Region Blekinge invests in a cloud-based business system solution from Unit4

Region Blekinge, a regional authority in southern Sweden, prioritized both current and future needs during the procurement process for its new financial solution. Following a thorough evaluation, Region Blekinge has partnered with Unit4, a leading provider of cloud-based business systems. Unit4's solution enables the region to optimize its internal IT resources by significantly reducing the demand for operational and maintenance tasks, among other key benefits.

Unit4, a leading provider of cloud-based business solutions, has entered into an agreement with Region Blekinge, which has selected Unit4 ERP as its new enterprise resource planning system. This solution will empower Region Blekinge's employees to work more efficiently and accomplish more with less effort, leveraging advanced automation capabilities to streamline processes.

Switching to a modern financial system delivered as Software-as-a-Service (SaaS) is the future, according to Alexander Drevstad, Sales Director for the Public Sector in the Nordic region at Unit4—particularly for Sweden's regional authorities.

"We are proud to offer a robust cloud solution that delivers significant business value for the public sector. We're excited to collaborate with Region Blekinge and help them maximize the benefits of our cloud technology", says Alexander Drevstad, Sales Director Public Sector, Nordic region at Unit4.

Sweden's public sector now has a golden opportunity to catch up with private businesses by continuing to develop its IT infrastructure.

"A modern, efficient financial system is crucial for Sweden's regions to meet both internal and external demands. Investments in digital tools today can drive substantial cost savings in the future. We're delighted that Region Blekinge has chosen our ERP system to support their goals," says Alexander Drevstad.

About Unit4

Unit4's next-generation enterprise resource planning (ERP) solutions power many of the world's mid-market organizations, bringing together the capabilities of Financials, Procurement, Project Management, HR, and FP&A to share real-time information and deliver greater insights to help organizations become more effective. By combining our mid-market expertise with a relentless focus on people, we've built flexible solutions to meet customers' unique and changing needs. Unit4 serves more than 5,100 customers globally across a number of sectors, including professional services, nonprofit and public sector, with customers including Southampton City Council, Metro Vancouver, Buro Happold, Devoteam, Save the Children International, Global Green Growth Institute and Oxfam America.
